Re: SecureTech's Wireless Panic/Duress System installed in your facility

Dear Kelly,

A WAVE wireless panic/duress alarm system from SecureTech, is set up in your facility. We hope that you continue to be satisfied with the performance of our equipment.

We are writing to inform you that the 2 year warranty on the WAVE system installed in courthouse has expired or will in the near future.

Please find attached a proposal to service the system and extend the warranty for an additional two years. The service includes testing the system and transmitters to ensure that it is still operating properly. We also replace the battery in the main WAVE unit and all transmitters. If you would like us to provide this service, please sign the proposal and fax or mail it back to us.

Regardless of whether you choose to participate in our extended warranty program, we highly recommend that your system be tested and the battery in the main unit, and in each transmitter be replaced every two years. If your system has repeaters, their batteries should be replaced as well.

Thank you for choosing the WAVE. Please let us know if we can be of any further assistance.
