Re: Repair washed out slope under the south abutment on Dowd Road

Dear Sir,

Coppell Construction Company Inc Tips contractor #170201 proposes to reestablish the south slope under the bridge on Dowd Road crossing Valley Branch. We propose to utilize gabion technology to build a series of short walls and slopes around the abutment. We propose to do the repairs for the lump sum price of \$ 81,000.00. This price is based on the County supplying the necessary rock, and access to the bottom of the creek. The price also includes the use of the existing broken concrete riprap as bedding material in and around the area. A copy of the proposed plan is attached. Should the scope of the work change beyond what has been discussed the price is subject to change. There is no warranty or guarantee expressed or implied and Coppell Construction Company is utilizing construction practices based on past experiences. There has been no engineering done except to get the opinion of Mike Hallum P.E., Tex-Dot Gainesville Area engineer and the designer of the original projects, opinion on the use of gabions to reestablish the slope. Coppell Construction Company indemnifies the owner only to the extent of our own negligence.

Sincerely,

Tom Weger
An Equal Opportunity Employer

Good morning Bob,

Thank you for contacting TIPS today.

This email is to confirm Coppell Construction Co Inc. is currently an awarded TIPS Vendor.
